#### **Introduction:**

The Missouri Department of Natural Resources' Solid Waste Management Program regulates Bridgeton Sanitary Landfill. Initially permitted on Nov. 18, 1985, this landfill ceased accepting waste on Dec. 31, 2004. The landfill waste mass encompasses approximately 52 acres with approximately 240 feet below the ground's surface and a total waste thickness of 320 feet. The waste is located in two distinct areas known as the North and South Quarries. Bridgeton Sanitary Landfill lies within the boundaries of the West Lake Landfill (Attachment A).

Historically, Bridgeton Sanitary Landfill has experienced high methane levels. Enforcement actions occurred in 2004 and in 2010 when the landfill had methane concentrations exceeding the regulatory limit at the property boundaries. The landfill owner notified the fire department and adjacent property owners of the potential for methane migration. Methane monitoring was conducted at structures adjacent to the landfill and methane alarms were offered for installation. The landfill has increased the number of extraction wells in order to control the methane gas generated on-site. These corrective actions significantly reduced methane readings in the wells historically exceeding regulatory limits. However, wells continued to have concentrations above the regulatory limit. Bridgeton Sanitary Landfill continues to conduct semi-annual checks of the adjacent structures and replaces batteries in methane alarms. The Solid Waste Management Program continues to work with Bridgeton Sanitary Landfill on developing and implementing a remedial plan focused on reducing methane concentrations in monitoring wells at the property boundary and controlling the gas by containing it on-site.

On Dec. 23, 2010, Bridgeton Sanitary Landfill reported to the Solid Waste Management Program the landfill was experiencing elevated temperatures on some gas extraction wells. In January 2011, the facility began testing landfill gas from the gas extraction system and found elevated hydrogen and carbon monoxide and reduced methane concentrations, which is indicative of a subsurface smoldering event. In January 2011, the Solid Waste Management Program tasked the facility owner with researching, designing and implementing actions to isolate the area with elevated temperatures to prevent expansion of the subsurface smoldering event. In early spring 2012, the subsurface smoldering event appeared to intensify as evidenced by rapid settlement, an increase in

odors and additional gas extraction wells with higher temperatures. On Jan. 31, 2013, Bridgeton Sanitary Landfill notified the Solid Waste Management Program that an expert consultant was being identified to begin new air sampling. On Feb. 1, the department issued an Order (Attachment B) to take control of collecting air quality data at Bridgeton Landfill. The document also orders Republic Services to pay for costs associated with data collection (Attachment C).

On Saturday, Feb. 2, 2013, the department began collecting air quality data around Bridgeton Sanitary Landfill using an AreaRAE system. This multi-sensor system comes equipped to detect volatile organic compounds, hydrogen sulfide, carbon monoxide and gamma radiation. The air quality data will be shared with the Missouri Department of Health and Senior Services for evaluation of public health concerns.

At the beginning of the air monitoring event, department staff discovered a leachate release resulting from a pipe becoming disconnected from the landfill's leachate collection system. Republic Services landfill staff had just discovered the release and immediately constructed a soil barrier in the storm water ditch to keep the release on landfill property. Republic Services mobilized vacuum trucks and excavating equipment and cleaned up the release. The release was reported to the department's Environmental Emergency Response Spill Line by department and Republic Services staff at the site. Leachate samples were collected by department staff and by Republic Services' contractor for analysis to determine if further action is necessary.

Bridgeton Sanitary Landfill, from here forward to be referred to as Bridgeton, is currently owned by Bridgeton Landfill LLC, and is a subsidiary of Republic Services Inc., from here forward to be referred to as Republic.

### **Observations:**

On February 1, 2013, at approximately 1700 hours, Cortvrient and Harris arrived in the area of Bridgeton and conducted a general reconnaissance of the area surrounding Bridgeton to determine possible locations for air monitoring. Contact was made with Jenny Turner, an adjacent landowner, who gave verbal permission to use her property to set up air monitoring equipment.

Cortvrient and Harris coordinated with Willoughby and Goodin at a nearby hotel to review the scope of work (Attachment D) and calibrate and charge air monitoring equipment (Attachment E).

At approximately 2200 hours, a planning meeting was conducted at the hotel between Harris, Cortvrient, Willoughby, and Goodin and Larry Lehman, Dan Norris, and Mike Parris, Missouri Department of Natural Resources.

On February 2, 2013 the aforementioned personnel convened in the lobby of the hotel and traveled in multiple vehicles to Hussmann Corporation, 12999 St. Charles Rock Road, Bridgeton, MO (security office) arriving at approximately 0605 hours where property access had been previously secured. Access was granted (Attachment F) and command was immediately established in the parking lot nearest the corner of Taussig Avenue and St. Charles Rock Road (Attachment G).

Preparing air monitoring equipment immediately commenced.

The weather station was not deployed due to a missing part.

0630 hours a safety briefing (Attachment H) was conducted.

Area Rae Unit # 12 and Area Rae Unit # 13 deployed on Hussmann Corporation perimeter fence near corner of Taussig Avenue and St. Charles Rock Road (Attachment I).

Area Rae Unit # 10 and Area Rae Unit # 11 deployed on Hussmann perimeter fence at southeast corner of property along St. Charles Rock Road (Attachment I).

Area Rae Unit # 7 and Area Rae Unit # 8 deployed on shelter picnic bench in Spanish Hills Village park ((City of Bridgeton) (Attachment I)). Area Rae Unit #8 not communicating with computer at command.

Area Rae Unit # 40 and Area Rae Unit # 41 deployed on large cement block across from Metropolitan Sewer District (MSD) lift station (Attachment I).

Multi Rae Unit # 114196 and Multi Rae Unit # 114194 deployed west of Car Credit City (automobile dealership), 12750 St. Charles Rock Road, Bridgeton, MO, perimeter on Turner property (Attachment I).

Area Rae Unit # 6 deployed on property line with Bridgeton on Turner property (Note: picture not taken).

Norris provided map (post sampling) of air monitoring sample point (Attachment J). Note: Multi Rae Unit # 114194 used as a screening tool for safety reasons. 131073 is the sample number of the leachate sample collected.

0745 hours Joe Trunko, Missouri Department of Natural Resources, arrived at command.

The National Weather Service (NWS) was consulted on-line throughout the day to obtain weather information for Bridgeton.

0840 hours provided telephone briefing to Brian Allen, Missouri Department of Natural Resources.

0845 hours Black leachate discharge discovered at Outfall #3 of Bridgeton NPDES permit which is just north and east of MSD lift station. Leachate has reportedly migrated off Bridgeton property. Republic officials bringing a track hoe and industrial dump truck loaded with dirt to contain the migration of leachate. Reportedly, additional corrective actions will be undertaken. Since a sample will be collected of the leachate, Lehman will contact the EER spill line to secure proper sampling items.

0840 hours provided telephone briefing to Allen.

0930 hours Jonathan Garoutte and Will Brantley, Missouri Department of Health and Senior Services, arrived at command.

1015 hours provided telephone briefing to Allen.

1145 hours Mike Ruddy, Missouri Department of Natural Resources, arrived with leachate sampling items.

1224 hours Willoughby reports observing two bald eagles on Bridgeton.

1310 hours Several hours of morning air monitoring data downloaded by Cortvrient and provided to Garoutte for evaluation.

1400 hours Cortvrient departs for Jefferson City.

1440 hours Lehman provides a briefing at command. Transfer of leachate samples from Lehman to Harris (Attachment K). Lehman reports Craig Almanza, Site Manager Republic, has requested a briefing at the end of the day. Lehman stated that data will be watched closely as darkness falls and unless there is a "significant" change observed, air monitoring operations will cease at 1800 hours.

1535 hours Garoutte completes assessment of data and provides a preliminary summary report and additional guidance (Attachment L). Garoutte departs for Jefferson City.

1545 hours Lehman advises that a Republic attorney called EER spill line to report the leachate discharge and stating that it reportedly did not leave Bridgeton property (Attachment M).

1630 hours Technical difficulties are experienced with the computer that controls the Area Rae system. Various actions taken over the course of the next 60 plus minutes to correct the problem prove unsuccessful.

1730 hours Decision made to cease air monitoring at 1800 hours.

1800 hours Air monitoring ceases. Personnel shut down all instrumentation and return all instruments to command whereupon they were stowed for transport back to Jefferson City.

1830 hours All DNR depart Hussmann Corporation property.

2150 hours provided text briefing to Allen.

**ORDER**

The Missouri Department of Natural Resources, by and through its Director, Sara Parker Pauley, hereby issues this Order directed to Bridgeton Landfill, LLC, pursuant to the authority of the Missouri Solid Waste Management Law, including Section 260.230 R.S.Mo.

**BACKGROUND**

1. The Bridgeton Landfill, LLC, a subsidiary of Republic Services, Inc., is the owner and operator of a solid waste disposal area permitted as the Bridgeton Sanitary Landfill, which bears permit number 118912 (hereinafter, "Landfill").
2. The Bridgeton Landfill LLC, has caused, and/or permitted to exist conditions that have resulted in, a subsurface fire, smoldering or oxidation event within its Landfill.
3. The Bridgeton Landfill LLC, has caused, and/or permitted to exist conditions that have resulted in, the migration of noxious or offensive odors from its premises.
4. On July 23, 2012, the Department issued a Notice of Violation to the Bridgeton Landfill, LLC documenting these violations, and stating that the Landfill was being operated in a manner that creates a public nuisance.

5. Air monitoring was conducted at various locations on the Landfill property on August 16-17, 2012. Based upon the results of the monitoring event, certain compounds were found to be present in downwind samples, providing evidence of emissions from the Landfill and the potential for off-site impacts. The Department's letter dated January 30, 2013 to Bridgeton Landfill, LLC documented this finding.

6. Between January 2012 and January 2013, the Department received numerous complaints from the public regarding the odors emanating from the Landfill. These odor problems are ongoing and unabated.

7. On January 31, 2013, the St. Louis County Department of Health conducted a compliance inspection of the Landfill, and found odors equal to or exceeding the 7:1 ratio established by 10 C.S.R. 10-6.165.

#### STATEMENT OF VIOLATIONS

The Department concludes that Bridgeton Landfill, LLC has violated the Missouri Solid Waste Management Law by storing, collecting, and/or disposing of solid waste in such a manner as to create a public nuisance, in violation of Section 260.210.1(4) R.S.Mo. and implementing regulations.

NOW THEREFORE, it is hereby ORDERED that:

1. Department staff, representatives, agents, contractors, and subcontractors will be conducting such collecting, sampling, and testing activities that are deemed appropriate by the Department, and Bridgeton Landfill, LLC shall not interfere in any way and shall provide whatever assistance that is required to further the Department's efforts. Bridgeton Landfill, LLC shall reimburse the Department for the costs associated with these activities.

2. Bridgeton Landfill, LLC shall implement all plans as approved by the Department to remedy any and all violations and nuisances that have been identified, and any that may arise or be discovered in the future.

3. Nothing within this Order shall be construed so as to resolve any claim or waive any right of the Department to pursue any other remedy allowed by law or equity, including but not limited to civil or administrative penalties, cost recovery, costs, and injunctive relief. Additionally, nothing within this Order releases Bridgeton Landfill, LLC of any liability it had, has, or may have in the future.

SO ORDERED:

MISSOURI DEPARTMENT OF NATURAL RESOURCES

### Department of Natural Resources issues an Order to take control of collecting air quality data at Bridgeton Landfill

For more information: 573-751-1010

Volume 41-009 FOR IMMEDIATE RELEASE: Feb. 1, 2013

**Jefferson City, Mo.** - The Missouri Department of Natural Resources today issued an Order to Republic Service Inc., which owns Bridgeton Sanitary Landfill, stating that the department will begin collecting air quality data at the landfill. The Order also instructs the company to pay for costs associated with this data collection, and to not interfere with the department's data collection operations.

The department, and independent contractors reporting directly to the department, will use equipment to collect that data, including an AreaRAE system that is a one-to-five sensor gas detector to assess current on-site air quality conditions. The AreaRAE is equipped with a wireless radio frequency modem that allows data transmissions to a remotely based controller. The multi-sensor instrument will be equipped for photoionization detection of volatile organic compounds, hydrogen sulfide, carbon monoxide and other gasses.

Air quality data gathered by the department will also be sent to the Missouri Department of Health and Senior Services to further evaluate any public health concerns associated with the area's air quality.

Additional information about the Bridgeton Sanitary Landfill is available on the Missouri Department of Natural Resources' website at [dnr.mo.gov/env/swmp/facilities/bridgetonsanitarylandfill-dnr.htm](http://dnr.mo.gov/env/swmp/facilities/bridgetonsanitarylandfill-dnr.htm).

###

Bridgeton Sanitary Landfill Air Monitoring  
Scope of Work  
MDNR-ESP-EER  
FEEJE/NJ13FIRE

Based upon a current thermal event at the Bridgeton Landfill, offsite odor concerns, recent sampling/analytical results, and potential public safety or health concerns, ESP-EER State On-Scene Coordinators (SOSCs) will mobilize to the area to conduct stationary and mobile air monitoring.

Planned activities include:

- Mobilize staff and equipment on 2/1/13 to conduct limited recon of area surrounding Bridgeton Sanitary Landfill site (Site) to staging of stationary monitors (Area Rae monitors)
- Staff will prepare a Health and Safety plan identifying, at a minimum, hazards for this work and the nearest medical, fire, and law enforcement locations, along with a map and contact information.
- Obtain site access, as warranted, to arrange for stationary monitors to be placed
- Deploy up to 6 Area Rae in locations surrounding the Site and begin a 12-hour air monitoring event for:
  - Hydrogen sulfide
  - Carbon monoxide
  - Volatile organic compounds
  - Gamma radiation (on a limited basis)
- Data points will be captured/recorded from each deployed unit on five-minute intervals for the above compounds/chemical classes of concern
- Geographic coordinates will be recorded for each stationary location
- SOSCs will also identify potential monitoring locations within, or near, residential areas close to the Site (residential subdivisions and/or mobile home parks).
- If locations are identified within, or near, residential areas, SOSCs will conduct additional air monitoring with handheld units set up to collect data for the same chemicals/chemical classes of concern as listed above. It is anticipated, SOSCs will collect five-minute readings on either a 30- or 60-minute schedule, along with the geographic coordinates.

This limited scope investigation is expected to conclude by approximately 2000 hours on 2/2/13. SOSCs will return and convey the data collected to appropriate MDNR and MDHSS personnel to determine and direct further sampling or mitigative actions.

## SITE HEALTH AND SAFETY PLAN

**ALL FIELDS ON THE FIRST TWO PAGES  
MUST BE FILLED OUT PRIOR TO LEAVING THE OFFICE!**

### GENERAL INFORMATION

MDNR EER On-Scene Coordinator: Brad Harris

Date and time notified: 02/01/13

Location/Directions: 13570 St. Charles Rock Road (Landfill)

Incident Description: odor in area near Landf: II

Material(s) Released: Odor - unknown

Estimated Quantity: N/A

### POTENTIAL HAZARDS

Physical State of the Material:  Liquid  Solid  Gas/Vapor

Chemical Characteristics (check all that apply):

- |                                      |                                     |                                    |                                      |
|--------------------------------------|-------------------------------------|------------------------------------|--------------------------------------|
| <input type="checkbox"/> Carcinogen  | <input type="checkbox"/> Biological | <input type="checkbox"/> Corrosive | <input type="checkbox"/> Combustible |
| <input type="checkbox"/> Explosive   | <input type="checkbox"/> Flammable  | <input type="checkbox"/> Volatile  | <input type="checkbox"/> Poison      |
| <input type="checkbox"/> Radioactive | <input type="checkbox"/> Reactive   | <input type="checkbox"/> Other:    |                                      |

Physical Hazards (check all that apply):

- |   |   |   |                                      |
|---|---|---|--------------------------------------|
| <input type="checkbox"/> Overhead           | <input type="checkbox"/> Below Grade                | <input type="checkbox"/> Confined Space*        | <input type="checkbox"/> Noise       |
| <input type="checkbox"/> Splash             | <input type="checkbox"/> Fire/Burn                  | <input type="checkbox"/> Puncture               | <input type="checkbox"/> Heat Stress |
| <input type="checkbox"/> Cut                | <input checked="" type="checkbox"/> Slip/Trip/Fall  | <input checked="" type="checkbox"/> Cold Stress | <input type="checkbox"/> Electrical  |

**Anticipated PPE Level Needed:**  A  B  C  D

## REMINDERS

The following action levels should be used to determine when a site should be evacuated and site conditions reevaluated. These action levels are based on a combination of site conditions and the personal protective equipment used by the responder.

PPE Level	Evacuate and reevaluate site conditions when:
<b>D</b> (TLD, hard hat, eye protection and work boots)	O <sub>2</sub> Concentration <19.5% or >25%, or Explosive atmosphere >10% LEL, or Organic vapors > background, or Radiation >500 mR/hr
<b>C</b> (TLD, APR, protective clothing, gloves, hard hat, work boots)	O <sub>2</sub> Concentration <19.5% or >25%, or Explosive atmosphere >10% LEL, or Unknown organic vapors in breathing zone > background, or Radiation >500 mR/hr
<b>B</b> (TLD, SCBA, protective clothing, gloves, hard hat, chemical resistant boots)	Explosive atmosphere >10% LEL, or Signs or symptoms of exposure occur (itching, burning or tingling skin), or Radiation >500 mR/hr
<b>A</b> (TLD, SCBA, fully-encapsulated suit, chemical-resistant gloves and boots)	Level A entry requires approval from duty officer and supervisor and will be considered on a case-by-case basis.

The levels provided in the above table are guidelines only. Refer to the NIOSH guide, Suit Smart and other references when selecting appropriate PPE.

**Anticipated Personnel Decontamination Procedures:** *N/A*

**Nearest Hospital (directions or attached map) and Phone Number:**

#### **Additional Information**

Report taken by: E4 BRANDON WEATHERLY at 15:14 on 07-FEB-13

The NRC fax states:

"the caller is reporting an unknown chemical in the atmosphere. the caller stated that an odor has been detected in the air. the caller stated it is believed that drilling is taking place at a local landfill, and may be the source of the chemical odor."

Instrument: AreaRAE Gamma      Serial Number: 500513

User ID: 00000001    Site ID: 00000001

Data Points: 704    Data Type: Avg    Sample Period: 60 sec

Last Calibration Time: 02/02/2013 00:07

Gas Type:	H2S(ppm)	VOC(ppm)	Gamma(uR/h)	LEL(%)	OXY(%)			
High Alarm Levels:	20	300.9	3445.4	20.2	23.5			
Low Alarm Levels:	10	100	500	10.1	19.5

Instrument: AreaRAE Gamma      Serial Number: 500514

User ID: 00000001    Site ID: 00000001

Data Points: 698    Data Type: Avg    Sample Period: 60 sec

Last Calibration Time: 01/12/2013 23:08

Gas Type:	CO(ppm)	VOC(ppm)	Gamma(uR/h)	LEL(%)	OXY(%)							
High Alarm Levels:	200	100.5	5000	20	23.5							
Low Alarm Levels:	35	50	500	10	19.5

Instrument: AreaRAE Gamma      Serial Number: 500511

User ID: 00000001    Site ID: 00000001

Data Points: 696    Data Type: Avg    Sample Period: 60 sec

Last Calibration Time: 02/02/2013 00:10

Gas Type:	H2S(ppm)	VOC(ppm)	Gamma(uR/h)	LEL(%)	OXY(%)						
High Alarm Levels:	20	100.5	5000	20	23.5						
Low Alarm Levels:	10	50	500	10	19.5
